RMC Foundation Unveils New Streamlined Website

Silver Spring, MD – July 31, 2017: The Ready Mixed Concrete (RMC) Research & Education Foundation is proud to announce the unveiling of a new, more streamlined website. The brand new www.rmc-foundation.org site was launched late last week.

“One of the great values found in the Foundation’s work are the many resources made available, for free, to the concrete and construction industries as well as to the communities we serve,” said Foundation Chairman Henry Batten of Concrete Supply Co., adding, “The new website will make it easier for people to find and download the resources they are seeking and to stay up-to-date with all of the Foundation’s work.” Foundation Executive Director Julie Garbini noted “The redesign of the Foundation’s website, which offers an easy-to-navigate, more visually-appealing format, is our first step in offering a more robust communications program. We have so many great resources and our new website will help us to broaden our reach in getting all of our reports, guides and studies into the hands of those who will use them.”

The new site includes links to most of the Foundation’s published work, as well as links to join our mailing list and to make a secure donation online. Visit the new www.rmc-foundation.org today!
