New Releases – Earlier this year, the Foundation was proud to release two new reports, including [A Scientific Investigation into Concrete Durability](#), which included a collaboration between researchers at the MIT Concrete Sustainability Hub, Oregon State University and the University of New Brunswick, and the report [Predictive Model for Void Content and Strength of Pervious Concrete Pavements Installed in the Field](#), from Washington State University. Both reports are important new releases to the Foundation's Concrete Applications library.

Concrete Products Magazine Highlights Foundation's 30th Anniversary – As part of their special World of Concrete edition, Concrete Products magazine included an article by Foundation Executive Director Julie Garbini highlighting its 30th Anniversary year. [You can read the piece – Value Tested – here](#). We have also produced a 30th Anniversary video, which may be viewed [here](#).

MIT Concrete Sustainability Hub (CSHub) Update – In addition to the durability study noted above, activity at the CSHub has remains high. Their [2020 Annual Report](#) details high productivity throughout 2020 despite the pandemic and the [recordings of past webinars and calendar of upcoming webinars](#) is a robust industry resource. Their body of work on [Embodied Carbon](#) continues to grow. If you do not already receive the CSHub monthly newsletter, please contact [Andrew Logan](#) to be added to their distribution list.

Walk for Wellness Returns/ConcreteWorks Preview – After missing last year, the Foundation is excited to bring back its popular Walk for Wellness as part of [NRMCA's ConcreteWorks 2021](#). More details about the Walk for Wellness may be found on the [registration page](#), including information about [sponsorship opportunities](#). The Foundation will celebrate and highlight its 30th Anniversary as part of its presence at ConcreteWorks. We look forward to meeting up with all of our industry friends once again!

You May Be Close Enough to "Level Up" – The RMC Research & Education Foundation lists its donors within several progressive donor levels. You or your company may be close to

moving up to the next donor level! Our contributor lists may be found on our [Contribute page](#), or for more information and to find out how close you are to being able to “Level Up”, please contact Foundation Senior Director [Jennifer LeFevre](#) for more information.

Coming Down the Pike – Here is a list of pending deliverables:

- Concrete Strength Model;
- Role of Air Content and SCMs Replacement in Deicing Salt Damage;
- Comprehensive Update to the Guide to Concrete Overlays of Asphalt Parking Lots;
- Minimum Design Requirements for ICF Wall Systems; and
- Concrete Habitat Homes and Design Competition.

Be sure to check our [homepage](#) regularly for new resources! If you have colleagues who are not yet receiving Foundation communications, please encourage them to sign up from the [“Join Our Mailing List”](#) link also available right from our homepage.
